

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1 - 38 (cancelled).

39. (currently amended) The magnetic foot therapeutic apparatus of Claim 38, 45, wherein said at least one foot therapy area is adapted to provide heat therapy to a user's foot placed over said at least one foot therapy area.

Claims 40 – 44 (cancelled)

45. (currently amended) ~~The magnetic foot therapeutic apparatus of Claim 44,~~ ² ~~wherein~~A magnetic foot therapeutic apparatus, comprising:

at least one foot therapy area;

a plurality of magnetic members disposed substantially under said

at least one foot therapy area and adapted to revolve simultaneously

about two axes to provide magnetic therapy to a user's foot placed over

said at least one foot therapy area;

an enclosure for said magnetic members;

said enclosure houses at least one magnetic member casing;

said at least one foot therapy area is formed on an exterior

surface of said enclosure;

PATENT

Appl. No. 10/720,616
Amdt. dated May 23, 2007

03-12495

12 said at least one magnetic member casing is adapted to rotatably
 accommodate a plurality of magnetic member housing units;
14 each of said housing units is adapted to revolve about a first axis
 of rotation; and
16 each of said magnetic members has a respective housing unit and
 is adapted to revolve about a second axis of rotation within a respective
18 housing unit, while said housing unit revolves about said first axis of
 rotation.

46. (previously presented) The magnetic foot therapeutic apparatus of Claim
2 45, wherein each of said magnetic members simultaneously revolves about said
 first and second axes to provide magnetic therapy to a user's foot placed over
4 said at least one foot therapy area.

47. (previously presented) The magnetic foot therapeutic apparatus of Claim
2 46, wherein each of said housing units is equipped with a pair of oppositely
 disposed permanent magnets, said oppositely disposed permanent magnets being
4 operatively coupled to a respective magnetic member.

48. (previously presented) The magnetic foot therapeutic apparatus of Claim
2 47, wherein said pair of oppositely disposed permanent magnets cause said
 respective magnetic member to revolve about said second axis of rotation within

4 said housing unit while said housing unit revolves about said first axis of
rotation.

2 49. (currently amended) The magnetic foot therapeutic apparatus of Claim 48,
wherein each of said magnetic members has a substantially spherical
configuration.

2 50. (currently amended) The magnetic foot therapeutic apparatus of Claim 49,
wherein each of said ~~substantially spherical~~ magnetic members is made from
permanent magnet material.

2 51. (currently amended) The magnetic foot therapeutic apparatus of Claim 50,
wherein each of said housing units has a substantially ring-shaped configuration.

2 52. (currently amended) The magnetic foot therapeutic apparatus of Claim 51,
wherein each of said ~~substantially spherical~~ magnetic members is adapted to
revolve on a central axle within a respective substantially ring-shaped housing
unit, said central axle having a longitudinal axis.

2 53. (currently amended) The magnetic foot therapeutic apparatus of Claim 52,
wherein each end of said central axle is securely engaged ~~by the way with~~ of
said substantially ring-shaped housing unit.

54. (previously presented) The magnetic foot therapeutic apparatus of Claim
2 53, wherein said longitudinal axis of said central axle defines said second axis of
rotation.
55. (previously presented) The magnetic foot therapeutic apparatus of Claim
2 54, further comprising means for simultaneously revolving each of said housing
units about said first axis of rotation.
56. (previously presented) The magnetic foot therapeutic apparatus of Claim
2 55, wherein said simultaneous revolving means includes at least one motor
operatively coupled to a shaft on each of said housing units via a belt and a
4 plurality of pulleys.
57. (previously presented) The magnetic foot therapeutic apparatus of Claim
2 56, wherein each shaft has a longitudinal axis.
58. (previously presented) The magnetic foot therapeutic apparatus of Claim
2 57, wherein said longitudinal shaft axis defines said first axis of rotation.
59. (previously presented) The magnetic foot therapeutic apparatus of Claim
2 58, wherein said belt is adapted to operate under said at least one casing.

60. (currently amended) The magnetic foot therapeutic apparatus of Claim 38, 45,

2 wherein said at least one foot therapy area has an irregular surface configured to
provide massage-like treatment to a user's foot placed over said at least one foot
4 therapy area.

Claims 61 – 63 Cancelled
